Reaffirming our Commitment
to
Quality Education!

Professional Tutoring

Senior Campus: Palmers Gateway, Truganina
Junior campus: Sapphire Square, Truganina

Greetings to all our students, families and staff. The last eight years have been phenomenal as Melbourne Tutorials, Truganina has established itself as a premier learning centre for school students.

Our students are not confined to the west and we have many students travelling every week from the eastern suburbs, to enrich their learning.

Thanks to all for your wishes and support!

NAPLAN

NAPLAN is used by governments, education authorities and schools to determine whether young Australians are meeting important goals in literacy and numeracy.

All students in Years 3, 5, 7 and 9 are expected to sit the NAPLAN tests, which are held in Term 1 each year.

NAPLAN gives a snapshot of how children are performing in reading, writing, spelling, punctuation, grammar, and numeracy. It complements other effective classroom assessment and reporting practices.

Items in the tests are based primarily on knowledge, understanding and skills gained from the prior year. As in all previous NAPLAN tests, there is also a small percentage of additional content from the year of testing and the following year of testing, providing the items can be solved with logical reasoning and are not dependent on curriculum coverage of new concepts. This is to ensure the range of items in the test allows all students to demonstrate their capability.

From 2023 NAPLAN is changing:

- The NAPLAN tests will move to Term 1.
- The NAPLAN test window will be from Wednesday 15 March to Monday 27 March.

Congratulations to all our students on securing outstanding results in NAPLAN 2022.

MAGIS Program at Thomas Carr College

The Magis Program at Thomas Carr College is designed to cater for the needs of capable students who demonstrate above average academic abilities, high levels of task commitment and a creative approach to problem solving. Through specialist curriculum, well-practiced teaching expertise, and a developed culture of high expectations, students will be stimulated, challenged and motivated towards even higher levels of achievement. Each year, students are selected, based on their academic level to participate in the Magis Program.

Students can follow a numeracy pathway where they will receive acceleration in Maths and Science, or a literacy pathway where they will be accelerated in English and Humanities. In some cases, students can participate in both the literacy and numeracy pathways. Selected students participate in this six-year program which is designed to enhance intellectual potential and development. Accelerated courses involve a combination of a faster-paced curriculum and more complex and abstract material which encourages students to further develop their capacity for higher-level thinking. Deeply rooted within the wisdom and tradition of Ignatian spirituality, the Latin word Magis means the greater, the excellent, the best.

Selection Process

A panel will review the academic data from all enrolment applications. The academic data will include reviewing of the student NAPLAN and PAT test results as well as their results from a specialised entry test ran by Thomas Carr College. The panel will also take into consideration the Grade 5 reports and any other discussions with the primary schools about the progress of the student. Letters of invitation will be forwarded to the parents of those students selected for the program, and parents and students will need to attend a compulsory information night during the Pentecost Term (Term 2). The program will allow space for 50 students. At the end of each semester the progress of each student will be reviewed. The academic results and work habit indicators of each student should continue to be worthy of a Magis scholar and should continue to maintain outstanding results in every subject undertaken. Should this not be the case at the end of the semester, the student will forfeit their place in the program for the following semester.

Benefits of the Program

Gifted or talented students experience a sense of wellbeing, positive development and engagement when provided with supportive and challenging learning environments and opportunities that are responsive to their individual strengths and interests.

Students in the Magis Program will experience:

- A differentiated curriculum that is stimulating and motivating.
 - Challenges in their specific areas of ability or interest.
 - Learning that encourages the development of problem-solving skills.
 - Opportunities to socialise and learn with peers of like-ability as well as work independently.
- Opportunities to overcome obstacles and earn success which will impact more positively on their self-esteem than easy accomplishments.

Congratulations to our students on selection to the MAGIS Program:

- **Elesh pandya**
- **Lakshya Bhanot**
- **Neil Gulati**

Melbourne Tutorials Term Dates 2022

Term 1: 31/01/ 2022 to 10/04/2022 (10 weeks)

Term 2: 25/04/2022 to 26/06/2022 (9 weeks)

Term 3: 01/07/2022 to 18/09/2022 (10 weeks)
