# Melbourne Tutorials Online Portal

Dear students and parents,

The Melbourne Tutorials online portal has been created to improve exam competence and confidence in our students.

Melbourne Tutorials online portal has various topic tests/ quizzes and mock tests.

The purpose of these quizzes is to improve speed and accuracy in the various components of Selective Entry and other competitive exams.

The tests are added progressively and students are advised to practise regularly.

Students should take these tests multiple times to gain proficiency.

An eventual score of 95% and above should be aimed at as the desirable outcome.

## Parents' role in their child's studies

Allocate suitable study space

Help develop organizing skills

Supervision and association

Study-centric approach

**Supporting your child in studies is a priceless investment.**

# Importance of good handwriting

Improving handwriting is important for school students for several reasons:

- **Improved communication:** Good handwriting makes written communication clear and easy to understand. It allows the reader to focus on the content of the message rather than struggling to decipher the words.
- **Better academic performance:** Students with good handwriting are more likely to perform better in exams as their answers are easier to read and understand. It also helps in improving the presentation of their work, which can lead to better grades.
- **Enhanced memory retention:** Research has shown that students who take handwritten notes retain information better than those who type their notes. This is because the process of handwriting helps to reinforce memory and improve recall.
- **Improved fine motor skills:** Handwriting involves the use of fine motor skills, which are important for activities such as drawing, painting, and playing musical instruments. By improving their handwriting, students can also improve their overall fine motor skills.
- **Boosts creativity:** Handwriting also plays an important role in developing creativity. When students are encouraged to write in their own unique style, it can help to foster creativity and imagination.

In summary, improving handwriting in school students is important as it can enhance communication, academic performance, memory retention, fine motor skills, and creativity.

From 2023, NAPLAN writing test will be online for grades 5 and above. This is a step in the wrong direction as students would be discouraged to improve handwriting.

**Various exams, including Selective Entry, have a writing component which is to be handwritten. The students who get accustomed to online submissions will be at a disadvantage as they will not get enough exposure and practice to do well at the competitive level.**

# Melbourne Tutorials Term Dates 2022

**Term 1:** 31/01/ 2022 to 10/04/2022 (10 weeks)
